

2014 Dodge Durango **OVERVIEW**

Chrysler Canada: The New 2014 Dodge Durango — The Ultimate No Compromise SUV Raises the Bar for Performance, Technology and Style in the Three-row SUV Segment

- Dodge Durango features advanced design and premium class-exclusive features for the 2014 model year
- All-new standard eight-speed transmission with rotary shifter improves fuel efficiency and enhances Dodge Durango's fun-to-drive DNA
- Now offering the latest Uconnect™ 8.4AN with 8.4-inch touchscreen and customizable instrument gauge cluster with 7-inch full-colour screen
- New LED lighting technology, including standard class-exclusive racetrack tail lamps with 192 LEDs, ties Durango to the latest Dodge vehicle designs
- Best-in-class towing of up to 3,357 kg (7,400 lb.) with V8 engine; 2,818 kg (6,200 lb.) with V6 engine
- Up to 50 different seating configurations, including optional second-row captain's chairs and 2,406 litres (85 cu. ft.) of cargo capacity
- Available class-exclusive dual screen Blu-ray / DVD player
- New suite of advanced technologies improves performance, safety, comfort and convenience
- Premium features, including available heated steering wheel and leather heated and ventilated seats, highlight Dodge Durango's attention to passenger comfort, while details such as bright chrome bezels and accent colour stitching keep the interior stylish

The Dodge brand is upping the ante in the fast-growing full-size sport-utility vehicle (SUV) and crossover segments with the introduction the new 2014 Dodge Durango. This new SUV is built on the Dodge brand's pillars of performance, style and innovation, delivering a new standard state-of-the-art class-exclusive eight-speed automatic transmission that improves fuel economy up to 10 per cent, the Chrysler Group's award-winning multimedia centre, easy-to-use touchscreen technologies and the Dodge brand's signature racetrack LED tail lamps to driving enthusiasts in the market for a three-row family performance SUV.

When Dodge re-introduced the Durango in 2011, it immediately earned accolades from customers and critics alike. Its combination of sleek yet muscular lines, comfortable three-row seating, large cargo volume, class-leading power, driving range and towing capability and overall driving enjoyment was unlike anything ever seen in the SUV segment before. For 2014, the engineers and designers at Dodge have made the ultimate “no compromise” SUV even better.

“When the Durango was first launched in 1998, it represented a breakthrough in power, size and style,” said Tim Kuniskis, President and CEO — Dodge Brand, Chrysler Group LLC. “Now for 2014, we’re upping the ante by making it our most technologically advanced, fuel efficient and dramatically styled Durango ever. With countless class-exclusive features and best-in-class attributes, the new 2014 Durango represents the ultimate no-compromise full-size SUV.”

The new 2014 Dodge Durango takes everything that customers love about Durango and adds the latest advancements in technology to enhance its design, capability and functionality. With a new standard eight-speed automatic transmission, improved fuel economy and performance, new LED exterior lighting, two new available multimedia touchscreens, a new customizable instrument cluster, and an available high-definition dual-screen Blu-ray entertainment system, the 2014 Dodge Durango reaches even higher levels of sophistication building on its proven performance, utility and comfort.

The 2014 Dodge Durango is available in five trim levels: SXT, Rallye, the new for 2014 Limited, R/T and Citadel. It will be built in the United States at the Jefferson North Assembly Plant in Detroit, Mich. Production is scheduled to begin in the third quarter of 2013.

Unique, yet appealing to all

Dodge is introducing the new 2014 Dodge Durango just as the SUV segments in North America are showing tremendous growth. With its standard three rows of seats and interior seating flexibility, Dodge Durango also appeals to shoppers looking for a full-size crossover. And of those full-size SUV and crossover sales, approximately 60 per cent are three-row vehicles, placing the Dodge Durango squarely in the heart of the market.

Dodge Durango customers are tech-savvy, youthful and full-of-life, with one of the youngest demographics in the segment. Their active lifestyles keep them on the run, and they depend on technology to keep them connected. The Dodge Durango delivers with the latest Uconnect™ multimedia technology and connectivity in an agile, flexible vehicle that is spacious with versatile three-row seating for passengers and their gear.

When the Dodge Durango debuted in 2011, it had a distinct advantage over the competition as an SUV designed to deliver performance, without compromising fuel economy. With the addition of the new

eight-speed automatic transmission with paddle shifters standard across the lineup, Durango ups the ante delivering improved efficiency, as well as a more refined and engaging driving experience.

The 2014 Dodge Durango offers a host of premium features, such as high-end interiors, the latest infotainment technology and impressive powertrain options, along with an exterior design that is distinctively Dodge.

New features and highlights on the 2014 Dodge Durango include:

- Segment-first eight-speed automatic transmission with rotary shifter allows for an improvement in fuel economy and a more refined driving experience
- Class-exclusive Dodge “racetrack” LED tail lamps with 192 LEDs
- New front fascia with floating signature Dodge crosshair grille
- New projector headlamps with available LED running lights
- 5-inch or 8.4-inch touchscreens with available class-exclusive Uconnect™ multimedia centre with 3D mapping navigation.
- Available voice command, Uconnect™ hands-free calling, streaming music via Bluetooth® and remote USB port
- Class-exclusive standard 7-inch customizable thin-film transistor (TFT) full-colour instrument cluster
- Available class-exclusive Blu-ray / DVD rear entertainment system with new dual 9-inch screens in the driver and front passenger seat-backs
- New three-spoke steering wheel with standard paddle shifters
- Available second-row captain’s chairs with a standard pass-through centre console that makes for easy travel between second- and third-row seats
- Available second-row full centre console with additional storage – available at all trim levels
- New available fully integrated tow hitch
- New Limited model with standard leather seats, heated seats, heated steering wheel and standard 8.4-inch Uconnect™ touchscreen
- Rallye Group with a sinister monochromatic appearance and class-exclusive 20-inch Hyper Black wheels
- All-new wheel lineup with a choice of seven wheels featuring 18-inch and 20-inch wheels with finishes ranging from silver painted to polished aluminum to class-exclusive Hyper Black
- New standard capless fuel fill making for easy fuel fill ups

- More than 60 available safety features, including:
 - Adaptive cruise control with stop function
 - Forward collision warning with collision mitigation
- Nine exterior colours, seven different wheels, nine different interiors, including premium cloth, leather and perforated premium Nappa leather with three different (black, light slate and red) stitching accents, unique bezels and headliners

High-tech exterior look

The Dodge Design team went to work to create a new exterior that conveys how advanced the Durango is, while maintaining the muscular body and confident personality customers expect from Dodge.

The new face of Durango is still distinctly Dodge and features a new, slimmer “split crosshair” grille with mesh textures unique to each trim level. Combined with the redesigned projector-beam headlamps and a raised front bumper, the 2014 Dodge Durango has an even more sinister look than the previous model. Dodge Durango’s sculpted hood and grille complete the unique to Dodge forward-leaning profile that continues through the deeply browed headlamps.

For a more monochromatic appearance, the Rallye and R/T models are equipped with dark-tinted headlamp bezels, body-colour front and rear lower fascias, wheel flares, grille and sill mouldings, all unique to these packages. The R/T’s ride height has also been lowered by 20 mm (.8 inch), further enhancing its sporty appearance and driving dynamics.

The 2014 Dodge Durango now features projector beam headlamps, with LED daytime running lamps on Rallye, Limited, RT and Citadel. The LED lamps run horizontally along the bottom edge of the headlamp and form a unique “hockey-stick” shape. Bi-xenon high-intensity discharge (HID) headlamps are standard on R/T and Citadel models, turning the night into day. Auto-levelling technology adjusts headlight beam aim for slight changes in elevation.

The new front-end design features new projector fog lamps and fog lamp surrounds and matching crosshair grille texture. Combined with the taller front bumper, the new lower fascia gives the 2014 Dodge Durango a wider and more aggressive look.

In line with Dodge Charger, the side profile of the Dodge Durango maintains its powerful shape, accented by muscular fender arches and curves that flow back in through the doors, resembling the iconic shape of a coke bottle. The greenhouse of the new Dodge Durango blends seamlessly into the

body and a body-colour rear spoiler significantly reduces drag while adding visual drama to the side profile.

The 2014 Dodge Durango receives all-new 18- and 20-inch aluminum wheel designs for every trim level, and feature finishes ranging from silver painted to polished aluminum to class-exclusive Hyper Black. In total, there are seven wheel designs and finishes to select from.

The rear of the Dodge Durango sees the addition of the dramatic LED racetrack tail lamp design inspired by the Dodge Charger and Dodge Dart. Still immediately recognizable as a Dodge Durango, this latest evolution of the racetrack design features a new technology that blends the individual LEDs into one seamless looking ribbon of light. In total, there are 192 LEDs in the new tail lamp assembly that give Dodge Durango a presence on the street and make it instantly recognizable as a Dodge.

The rear fascia has been re-sculpted to fully integrate the trailer hitch. This gives Dodge Durango a cleaner, more premium look. Large 90 mm (3.5-inch) dual exhaust tips are standard on V8-equipped vehicles, as well as rallye and Citadel when powered with the V6 engine; other V6 powered Dodge Durango models have a 76 mm (3-inch) single tip.

A driver's three-row SUV

The new 2014 Dodge Durango continues to deliver excitement and refinement with world-class suspension and performance. Benchmarked against premium performance SUV's in the market, Dodge Durango delivers modernized refinement with electronics, suspension and structural characteristics that are usually found at much higher price points.

The unibody structure is built with a selection of high-strength and ultra-high strength steels that improve driving dynamics by integrating the suspension with the body — reducing flex and weight when compared with body-on-frame designs.

The short/long arm front suspension and isolated multi-link rear suspension features isolated front and rear cradles to deliver precise on-road handling and comfort. The four-wheel independent suspension, combined with the Dodge Durango's nearly 50/50 weight distribution, transmits to a solid driving feel with fun-to-drive characteristics.

Dodge Durango delivers on the pavement as well with aggressive shock and spring rates and large sway bars to handle body roll in hard turning maneuvers. Electro-hydraulic power steering, unique caster and camber settings along with standard electronic stability control also contribute to maintain tire grip and vehicle stability.

The Dodge Durango's two AWD systems – one for the HEMI® V8 and one for Pentastar™-powered models – greatly enhance the vehicle's traction and handling by delivering a smooth driving experience on a wide range of road conditions.

While competitors have switched to front-wheel-drive car-based platforms, the available HEMI®-powered AWD Dodge Durango features a low-range transfer case with a neutral position. Low range improves light off-road performance and helps ease maneuvers, such as pulling a boat up a steep launch or backing up with a trailer. The neutral position in the transfer case allows the vehicle to be flat-towed without damaging powertrain components.

A robust structure, impressive braking and unexpected stability also contribute to the Dodge Durango's best-in-class trailer tow capability. On models equipped with the Pentastar™ V6 engine, the Dodge Durango can tow up to 2,812 kg (6,200 lb.). When coupled with the 5.7-litre HEMI® V8 engine, the new 2014 Dodge Durango offers trailer tow capability of up to 3,357 kg (7,400 lb.) –up to 65 per cent more than the competition.

All-new class-exclusive eight-speed automatic transmission

The new 2014 Dodge Durango now features Chrysler Group's new eight-speed automatic transmission with rotary shifter and steering wheel-mounted paddle shifters as standard equipment on all models. This state-of-the-art transmission improves fuel economy, along with enhanced performance and smoother shifts. All these attributes perfectly enhance Dodge Durango's fun-to-drive nature.

Fully electronic, the eight-speed automatic features on-the-fly shift map changing, with manual shifting capability using steering-wheel paddle controls. More than 40 individual shift maps for specific conditions optimize shift quality and shift points for fuel economy, performance and drivability. The intelligent software is attuned to the performance requirements of almost any driving demand.

The transmission efficiency and wide ratio spread provide the best possible fuel economy by operating at a lower engine rpm in both city and highway environments. The addition of more gear ratios also helps reduce the gaps normally associated with upshifting and downshifting.

Gear changes are nearly imperceptible due to the evenly spaced gear steps between each gear ratio. Internally, the transmission has four gear sets and five shift elements (multi-disc clutches and brakes). Only two shift elements are open at any time. With fewer open shift elements, drag losses due to multiple parts rotating relative to one another are reduced, improving fuel efficiency.

Powertrain choices

Named one of *Ward's Automotive* "10 Best Engines" in the industry three years in a row, Dodge Durango's standard 3.6-litre Pentastar™ V6 engine paired with the new standard eight-speed

transmission delivers not only fuel-economy improvements when compared with the previous transmission, but also improved performance. The standard flex-fuel 3.6-litre Pentastar™ V6 engine generates an impressive 290 hp (295 horsepower on Rallye) and 260 lb.-ft. of torque, and can tow up to a best-in-class 2,812 kg (6,200 lb.).

The 5.7-litre HEMI® V8 engine produces a best-in-class 360 horsepower and 390 lb.-ft. of torque with a best-in-class tow rating of 3,357 kg (7,400 lb.). The 5.7-litre engine's FuelSaver Technology with cylinder-deactivation seamlessly alternates between smooth, high-fuel-economy four-cylinder mode when less power is needed and V8 mode when more power is in demand. This optimizes fuel economy when V8 power is not required, without sacrificing vehicle performance or capability.

All-new Eco Mode

The 2014 Dodge Durango features a new Eco Mode that contributes to its improved fuel economy. Eco Mode optimizes the transmission's shift schedule, as well as throttle sensitivity, and FuelSaver Technology with cylinder deactivation in V8 models, to maximize fuel economy. The Eco Mode also manages interactive deceleration fuel shut-off (IDFSO), which cuts fuel delivery when the vehicle is coasting to reduce fuel consumption.

Eco Mode is automatically engaged upon vehicle startup. A button on the Dodge Durango's centre stack allows drivers to disengage Eco Mode if more spirited performance is desired.

Advanced interior with premium craftsmanship

For the 2014 model year, Dodge designers are bringing Durango to the forefront of technology in the full-size SUV segment, while taking nothing away from the utility and build quality for which Durango is known.

The new instrument panel features a redesigned centre stack that houses the new 5-inch or 8.4-inch Uconnect™ touchscreens. Under these large, easy-to-use touchscreens are redundant button and knob controls for audio and climate functions. The bottom of the centre stack houses a new media hub with an SD card slot, USB outlet and auxiliary jacks, as well as a storage bin.

The centre console features a new segment-first rotary shifter for the standard eight-speed automatic that adds another level of refinement over the traditional gated automatic shifter. Manual shift functions have moved to paddle shifters on the back of the Dodge Durango's new steering wheel. These paddle shifters are standard on all 2014 Dodge Durango models.

The instrument cluster has also been given the high-tech treatment and now includes a full-colour 7-inch customizable screen similar to the one found in the Dodge Dart. Standard on all models, this screen allows for drivers to customize more than 100 ways how information is presented.

Framing the new instrument cluster is a redesigned three-spoke steering wheel with the previously mentioned standard paddle shifters. The buttons to control driver information in the gauge cluster are now larger and illuminated to make them easier to operate. Buttons for Uconnect™ and phone access now reside along the bottom edge of the vertical spokes. As before, Dodge Durango's popular audio controls are still found on the back of the upper steering wheel spokes. A large lockable glove box has a viscous-dampened hinge, which helps it open and close smoothly.

Seating flexibility

With standard seven-passenger seating and luxurious second-row captain's chairs available on all models, the seats in the 2014 Dodge Durango can be converted to as many as 50 different configurations.

Families with three or more children will find the Dodge Durango's available captain's chairs with pass-through especially helpful as two car seats can stay latched into the second row seats, and there's still easy pass-through for passengers to walk between to get to the third row. The second-row captain's chairs will also make adults feel like they are riding in first-class, with comfortable bucket seats that have individual armrests.

The available second-row console features a dual-hinged door/armrest that when flipped forward, has a hard surface so that the armrest is not damaged by cargo. It also offers class-exclusive storage and features, including a USB port for charging electronics.

A fold-flat front passenger seat is standard on models that aren't equipped with the ventilated seat option. By folding forward, the passenger seat provides more utility, which lets customers load and carry long objects. Once flat, the seat back panel also serves as a convenient utility table. A versatile 60/40 split folding second-row seat conveniently folds and tumbles.

Transporting long items, like 10-foot 2x4s, is not a problem as the left side of the second row folds 60 per cent, allowing the versatility of folding the 40 per cent seat in tandem with the front passenger fold-flat seat. Longer items can be stowed even with passengers in the second row. To make passengers even more comfortable, second-row seats also are available with heat, and they recline 18 degrees.

The third-row seat features a 50/50 split and is easily folded from the rear of the vehicle. For even more utility, both the second- and third-row seats fold to provide a flat load floor to haul a 6-foot couch with

room for a coffee table. Clever touches abound, including a switch in the instrument panel to remotely lower the third-row headrests when not in use.

State-of-the-art technology

A customizable 7-inch instrument gauge display, 5-inch or 8.4-inch touchscreens, the latest generation of Uconnect™ multimedia centres, forward collision warning with crash mitigation, and adaptive cruise control with stop are just some of the 2014 Dodge Durango's available state-of-the-art features.

The forward collision warning system with crash mitigation alerts the driver if they're approaching a vehicle in front too quickly, and the new adaptive cruise control with stop will keep the Dodge Durango at a driver-selected distance from the vehicle in front when cruise control is engaged and can even bring the SUV to a controlled stop.

In the 2014 Dodge Durango, customers can put away their smartphones, keep their hands on the steering wheel and still interact with their devices in the ways to which they are accustomed.

Additional convenience is achieved when Uconnect™ syncs a customer's phone so their favourite artists and contacts are all available at the touch of the screen, or by the sound of their voice.

Uconnect™ also allows the driver to execute many other functions, such as climate, audio and Bluetooth®, all by voice. The Dodge Durango's Uconnect™ 8.4AN navigation system features new 3D maps with graphic representations of well-known landmarks and terrain, designed to make on-road travel even easier to navigate. When equipped with the Uconnect 8.4AN, nav-ready, multimedia centre, customers can opt to have their Dealer activate the navigation system any time after purchase.

A new 5-inch touchscreen is now standard on SXT, Limited, Rallye and R/T models and controls audio, climate, phone and other vehicle functions, such as turning on the heated seats or determining how long the headlamps stay on after the ignition has been turned off. The high-resolution screen is intuitive and easy to use, yet redundant controls for audio and climate can be found below the touchscreen for drivers who prefer the classic dial approach.

Standard on Citadel models (and available on Limited and R/T) is the award-winning 8.4-inch Uconnect™ touchscreen that controls audio, climate, phone, vehicle functions and navigation (if equipped). This system provides large, easy-to-read graphics – including new 3D mapping – with intuitive, easy-to-use controls.

The most looked at area of the interior, the instrument cluster, also has a new premium high-tech appearance with the new dynamic gauge cluster. Standard on all models and featuring a customizable

7-inch full colour liquid-crystal display, the cluster can be configured more than 100 ways for the ultimate driver-customized experience. Navigation, audio and fuel economy information and warning indicators can all be displayed in the 7-inch screen.

Mounted on the back of the front seats is an available, all-new, class-exclusive Blu-ray video rear entertainment system. This new system features two high-resolution 9-inch screens, one on each front seat back. Each screen offers four-times better resolution when compared with previous models and allow customers to watch their movies on Blu-ray or standard DVDs, or play their high-definition media interface (HDMI) gaming systems via inputs for HDMI cables or RCAs for each screen integrated into the front seat backs. Wireless headphones are included as is a wireless remote.

More than 60 safety and security features are available on Dodge Durango

The new 2014 Dodge Durango offers consumers more than 60 available safety and security features, including standard all-speed traction control and Electronic Stability Control (ESC), which improve overall vehicle handling and performance both on- and off-road. Standard trailer-sway control enhances towing capabilities and keeps the vehicle and trailer aligned as the Dodge Durango travels down the road.

Safety and security features available for the first time on the Dodge Durango include forward collision warning with crash mitigation, adaptive cruise control with stop and driver knee bolster air bag. Blind-spot Monitoring (BSM) and Rear Cross Path (RCP) detection, which aid drivers when changing lanes or in parking lot situations, are also available. In addition, standard front-row active head restraints, standard full-length three-row side-curtain air bags and standard front-seat-mounted side thorax air bags offer enhanced occupant protection to passengers in the event of a collision. In total, Dodge Durango offers nine standard airbags.

Manufacturing

The 2014 Dodge Durango will be built in the United States at the Chrysler Group LLC's Jefferson North Assembly Plant (JNAP) in Detroit, Michigan, where the Durango has been produced since 2010 when the third-generation Dodge Durango was reintroduced for the 2011 model year. It is built on the same assembly line as the most-award winning SUV ever – the Jeep Grand Cherokee – which has been built at JNAP since the facility opened its doors in 1992.

One of only two assembly plants located entirely within Detroit's city limits, Jefferson North has been boosting its employment levels since June 2009. JNAP has added more than 2,200 employees on two shifts in the past four years, bringing total plant employment to nearly 4,700. The plant runs six days a week, 20 hours a day in order to keep up with demand of the hot-selling SUVs.

About Dodge

For nearly 100 years, Dodge has defined passionate and innovative vehicles that stand apart in performance and style. Building upon its rich heritage of muscle cars, racing technology and ingenious engineering, Dodge offers a full-line of cars, crossovers, minivans and SUVs built for top performance – from power off the line and handling in the corners, to high-quality vehicles that deliver unmatched versatility and excellent fuel efficiency. Only Dodge offers such innovative functionality combined with class-leading performance, exceptional value and distinctive design. With the Dodge Dart joining the line-up alongside Canada's best-selling crossover, Dodge Journey; the iconic, made-in-Canada Dodge Challenger and Dodge Charger paired with the eight-speed transmission; the new Dodge Durango; Dodge Avenger and the country's number-one selling minivan, Dodge Grand Caravan - the Dodge brand continues as one of the youngest dealer showrooms in North America.

About Chrysler Canada Inc.

Founded as the Chrysler Corporation in 1925, Chrysler Canada Inc. is based in Windsor, Ontario, and celebrates its 88th anniversary in 2013. Chrysler Canada's product lineup features some of the world's most recognizable vehicles, including the Dodge Grand Caravan, Jeep® Wrangler, Chrysler 300 and Ram trucks.

Chrysler Canada is a wholly owned subsidiary of Chrysler Group LLC, one of the world's leading automotive companies. Chrysler Group LLC, formed in 2009 from a global strategic alliance with Fiat Group, produces Chrysler, Jeep®, Dodge, Ram Truck, SRT, FIAT and Mopar® vehicles and products. With the resources, technology and worldwide distribution network required to compete on a global scale, the alliance builds on Chrysler's culture of innovation – first established by Walter P. Chrysler in 1925 – and Fiat's complementary technology – from a company whose heritage dates back to 1899. Fiat will contribute world-class technology, platforms and powertrains for small- and medium-sized cars, allowing Chrysler Group to offer an expanded product line including environmentally friendly vehicles.
