#### About the 2017 Ram ProMaster

The ProMaster is Ram Commercial's entry for the Class 2 full-size van segment. Ram's full-size van benefits from a class-exclusive front-wheel-drive system that reduces weight and complexity by locating all components beneath the cab. This keeps the cargo load floor height and step-in height very low, which is a benefit to a person getting in and out of the van all day. The front-wheel-drive configuration also helps when driving on low-traction surfaces, like snow, since there is always weight on the front wheels to provide traction. With both gas and EcoDiesel powertrain options available, the ProMaster is a purpose-built, highly customizable van designed to exceed the demands of commercial customers and upfitters.

  - Cargo width between wheel wells – 1,422 mm (56 in.)
